## SCRAP SURVEY OUTLINE PC BOARD MANUFACTURING

1. Solder Residues Generated from Hot Air Leveling <input type="checkbox"/> Solder Dross / Decant Flux Oil <input type="checkbox"/> Solder Dross after Copper Treatment / Decant Flux Oil <input type="checkbox"/> Solder Pot Dumps or Splatters <input type="checkbox"/> Solder Containing Recoverable Gold	2. <input type="checkbox"/> Gold Plated Printed Circuit Board Trimmings, Webblings, Fingers
3. Spent Electroplating Anodes <input type="checkbox"/> Pure Tin <input type="checkbox"/> Solder <input type="checkbox"/> Copper <input type="checkbox"/> Nickel	4. Precious Metal Recyclables from Electroplating <input type="checkbox"/> Plated Devices <input type="checkbox"/> Nodules on Plating Racks or Wires <input type="checkbox"/> Dangler Wire <input type="checkbox"/> Ion Exchange Resins <input type="checkbox"/> Filters, Rags
5. Printed Circuit Board Trimmings, Webblings – No Precious Metals <input type="checkbox"/> Copper Clad <input type="checkbox"/> Solder Coated	

## MICROCIRCUIT MANUFACTURING

1. Precious Metal Bearing Items, Such As; <input type="checkbox"/> Rejected or Obsolete Parts and Cutting Dust <input type="checkbox"/> Empty Jars with Residual Precious Metal Inks or Epoxy <input type="checkbox"/> Kimwipes, Rags, Applicators with precious metals <input type="checkbox"/> Solvent Cleanup Material with precious metals
2. <input type="checkbox"/> Sputtering Targets
3. <input type="checkbox"/> Sputtering Targets to be stripped and returned to customer.
4. <input type="checkbox"/> Vapor Deposition – Bell Jar Scrapings
5. <input type="checkbox"/> Bead Blasting Residues from Clean Up
