SCRAP SURVEY OUTLINE

CAPACITOR MANUFACTURING AND METALIZING

1. Wire Alloys <input type="checkbox"/> Babbitt (High Tin) <input type="checkbox"/> Babbitt and Zinc (Mixed) <input type="checkbox"/> Pure Tin <input type="checkbox"/> Solder Alloys <input type="checkbox"/> Solder and Zinc (Mixed)	2. Spray Room Residues Generated As <input type="checkbox"/> Overspray Flakes, Grates, Clumps and Wire Ends from Clean Up, <input type="checkbox"/> Powder from Collection System (Wet or Dry)
3. <input type="checkbox"/> Tin Foil Capacitors – No Aluminum	

MISCELLANEOUS MANUFACTURING

1. Solder Dross Generated From: <input type="checkbox"/> Radiator, Heat Exchanger Assembly <input type="checkbox"/> Centrifuge, Spinning <input type="checkbox"/> Casting Alloy Production <input type="checkbox"/> Dipping Parts	2. Tin Dross Generated From: <input type="checkbox"/> Coating Copper Wire <input type="checkbox"/> Dipping Parts or Wire <input type="checkbox"/> Casting Pure Tin
3. Babbitt Residues <input type="checkbox"/> Dross <input type="checkbox"/> Machining Chips and Excess	4. Circuit Breaker Assembly <input type="checkbox"/> Silver Contacts on Copper and Iron <input type="checkbox"/> Loose Silver Bearing Contacts
5. <input type="checkbox"/> Silver Plated Copper Wire (Bare or Insulated)	6. Decorative Industry <input type="checkbox"/> Jars, Kimwipes, Parts w/ Precious Metal Inks or Epoxy
7. Costume Jewelry <input type="checkbox"/> Casting Alloy Dross <input type="checkbox"/> Gold Plated Castings
